SPECIAL NOTICE.

DOUBLE CIRCULATION.

DOUBLE CIRCULATION.

We desire to call the attention of the trade to the construction of our "POLAR" Refrigerator. It is placed upon the market, knowing that as a preserver of food it has NO SUPERIOR, and for economy of ice it has NO EQUAL. As seen by the "sectional view," it is charcoal filled and zinc lined. The Ice Chamber is lined with galvanized iron, and made in the most superior manner.

To make this a **Dry Air** Refrigerator it is automatic in its operation, for as soon as the ice is placed in the chamber, we obtain a DOUBLE CIRCULATION between the Ice Compartment and the Provision Chamber. The bottom of the Ice Chamber being solid, except the opening in the center, the **Cold Dry Air** at once descends (see accompanying cut) to the Provision Chamber, and in turn forces the damp WARM AIR through the OPENINGS in the SIDES over and in contact with the ice, which reduces the temperature and ABSORBS the GASES and impurities, to be carried off in the waste water, and circulating again among the provisions **Dry Air**, PURE and SWEET. We claim a **Dry Air Refrigerator** that will keep any and all kinds of fruit, vegetables, meats, etc., SWEET and DRY, and free from TAIN or MOULD.

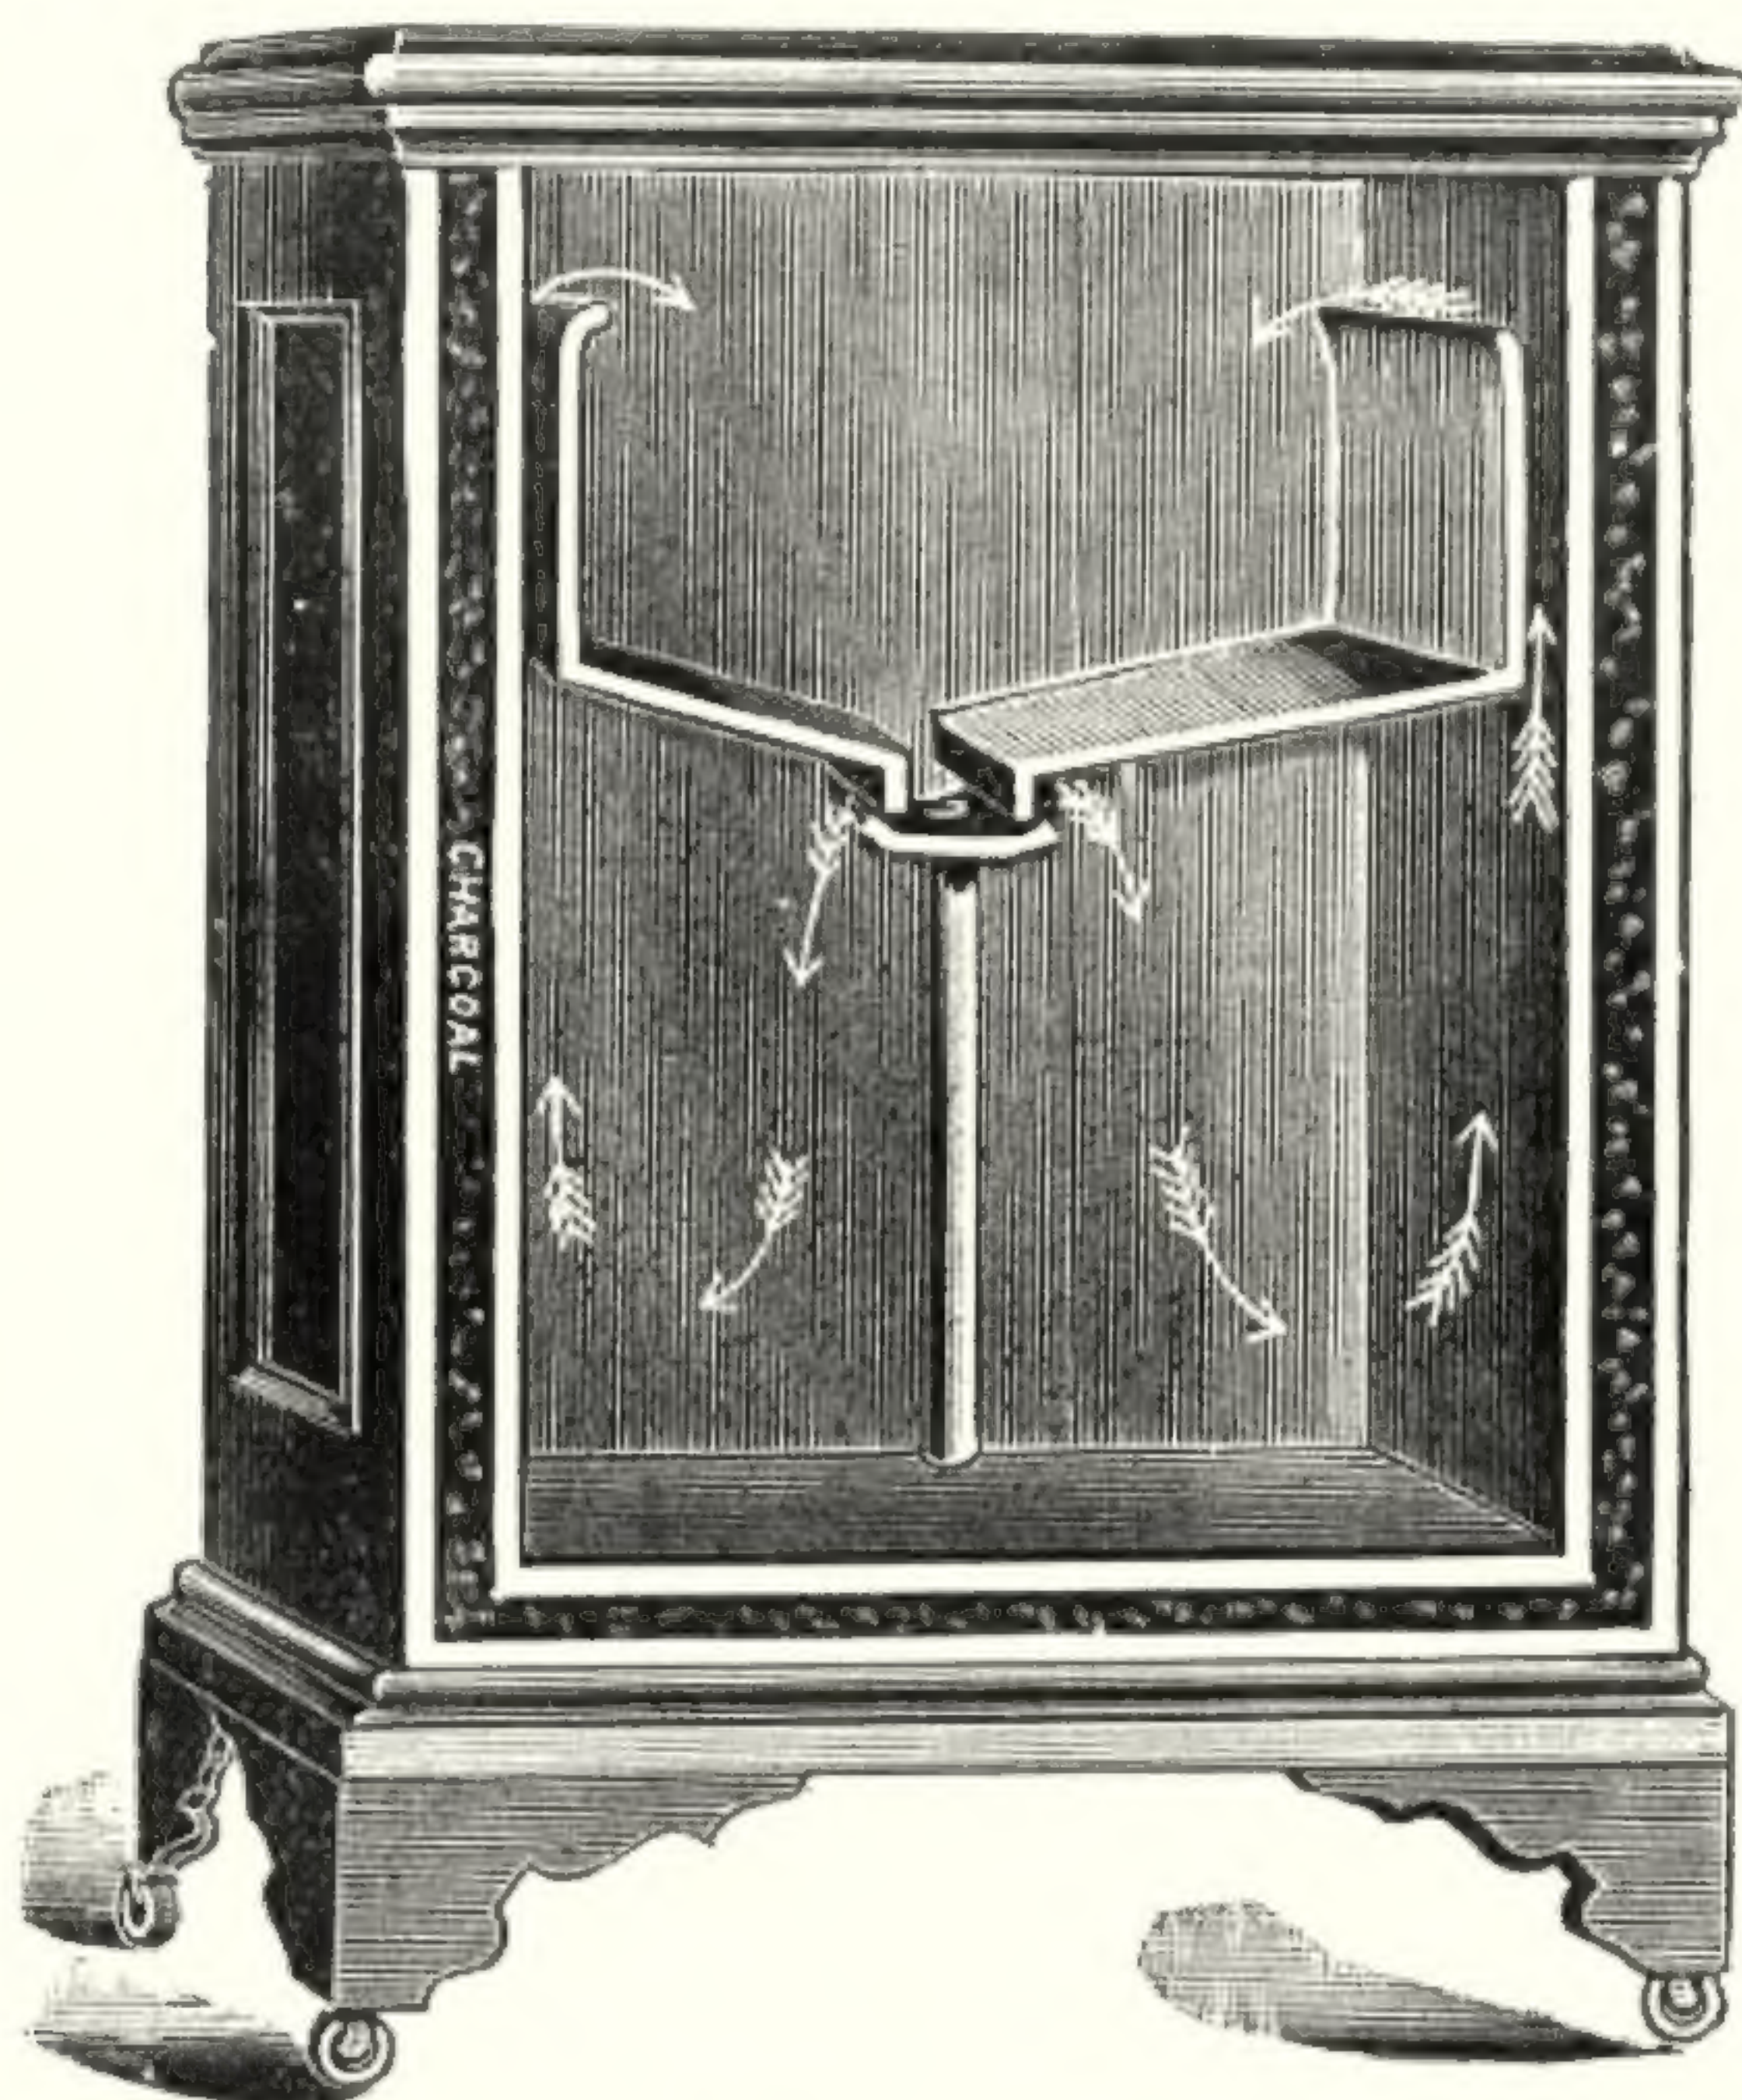

The past ten years have proved that this style of Refrigerator is the BEST that the trade can buy for family use, and which we very cordially recommend in preference to any other style.

Respectfully yours, etc.,

GEO. N. PIERCE & CO.

SPECIAL NOTICE.

DOUBLE CIRCULATION.

DOUBLE CIRCULATION.

Nos. 53, 54, 55, 83, 84, are made with Ice Chamber as shown in above cut.

All our Refrigerators are Zinc Lined and CHARCOAL FILLED. The bottoms are all made flush, and can be more easily cleaned than any other on the market.

TO THE TRADE.

SCIENCE proves as follows: the atmosphere at a temperature of 85° to 90° contains FOUR times the moisture it does at 41° to 43° (in our Refrigerator the ice absorbs this difference). We claim to have a "RECORD" for making a Refrigerator that will reduce the temperature to 42°, and forcing the moist air from the PROVISION CHAMBER, absorbing that moisture and conveying the same into the waste pipe. We have an article that is COOL and DRY. We are prepared to prove this to any one by *demonstration* in the use of any of our Refrigerators constructed on the "Polar" style of circulation.

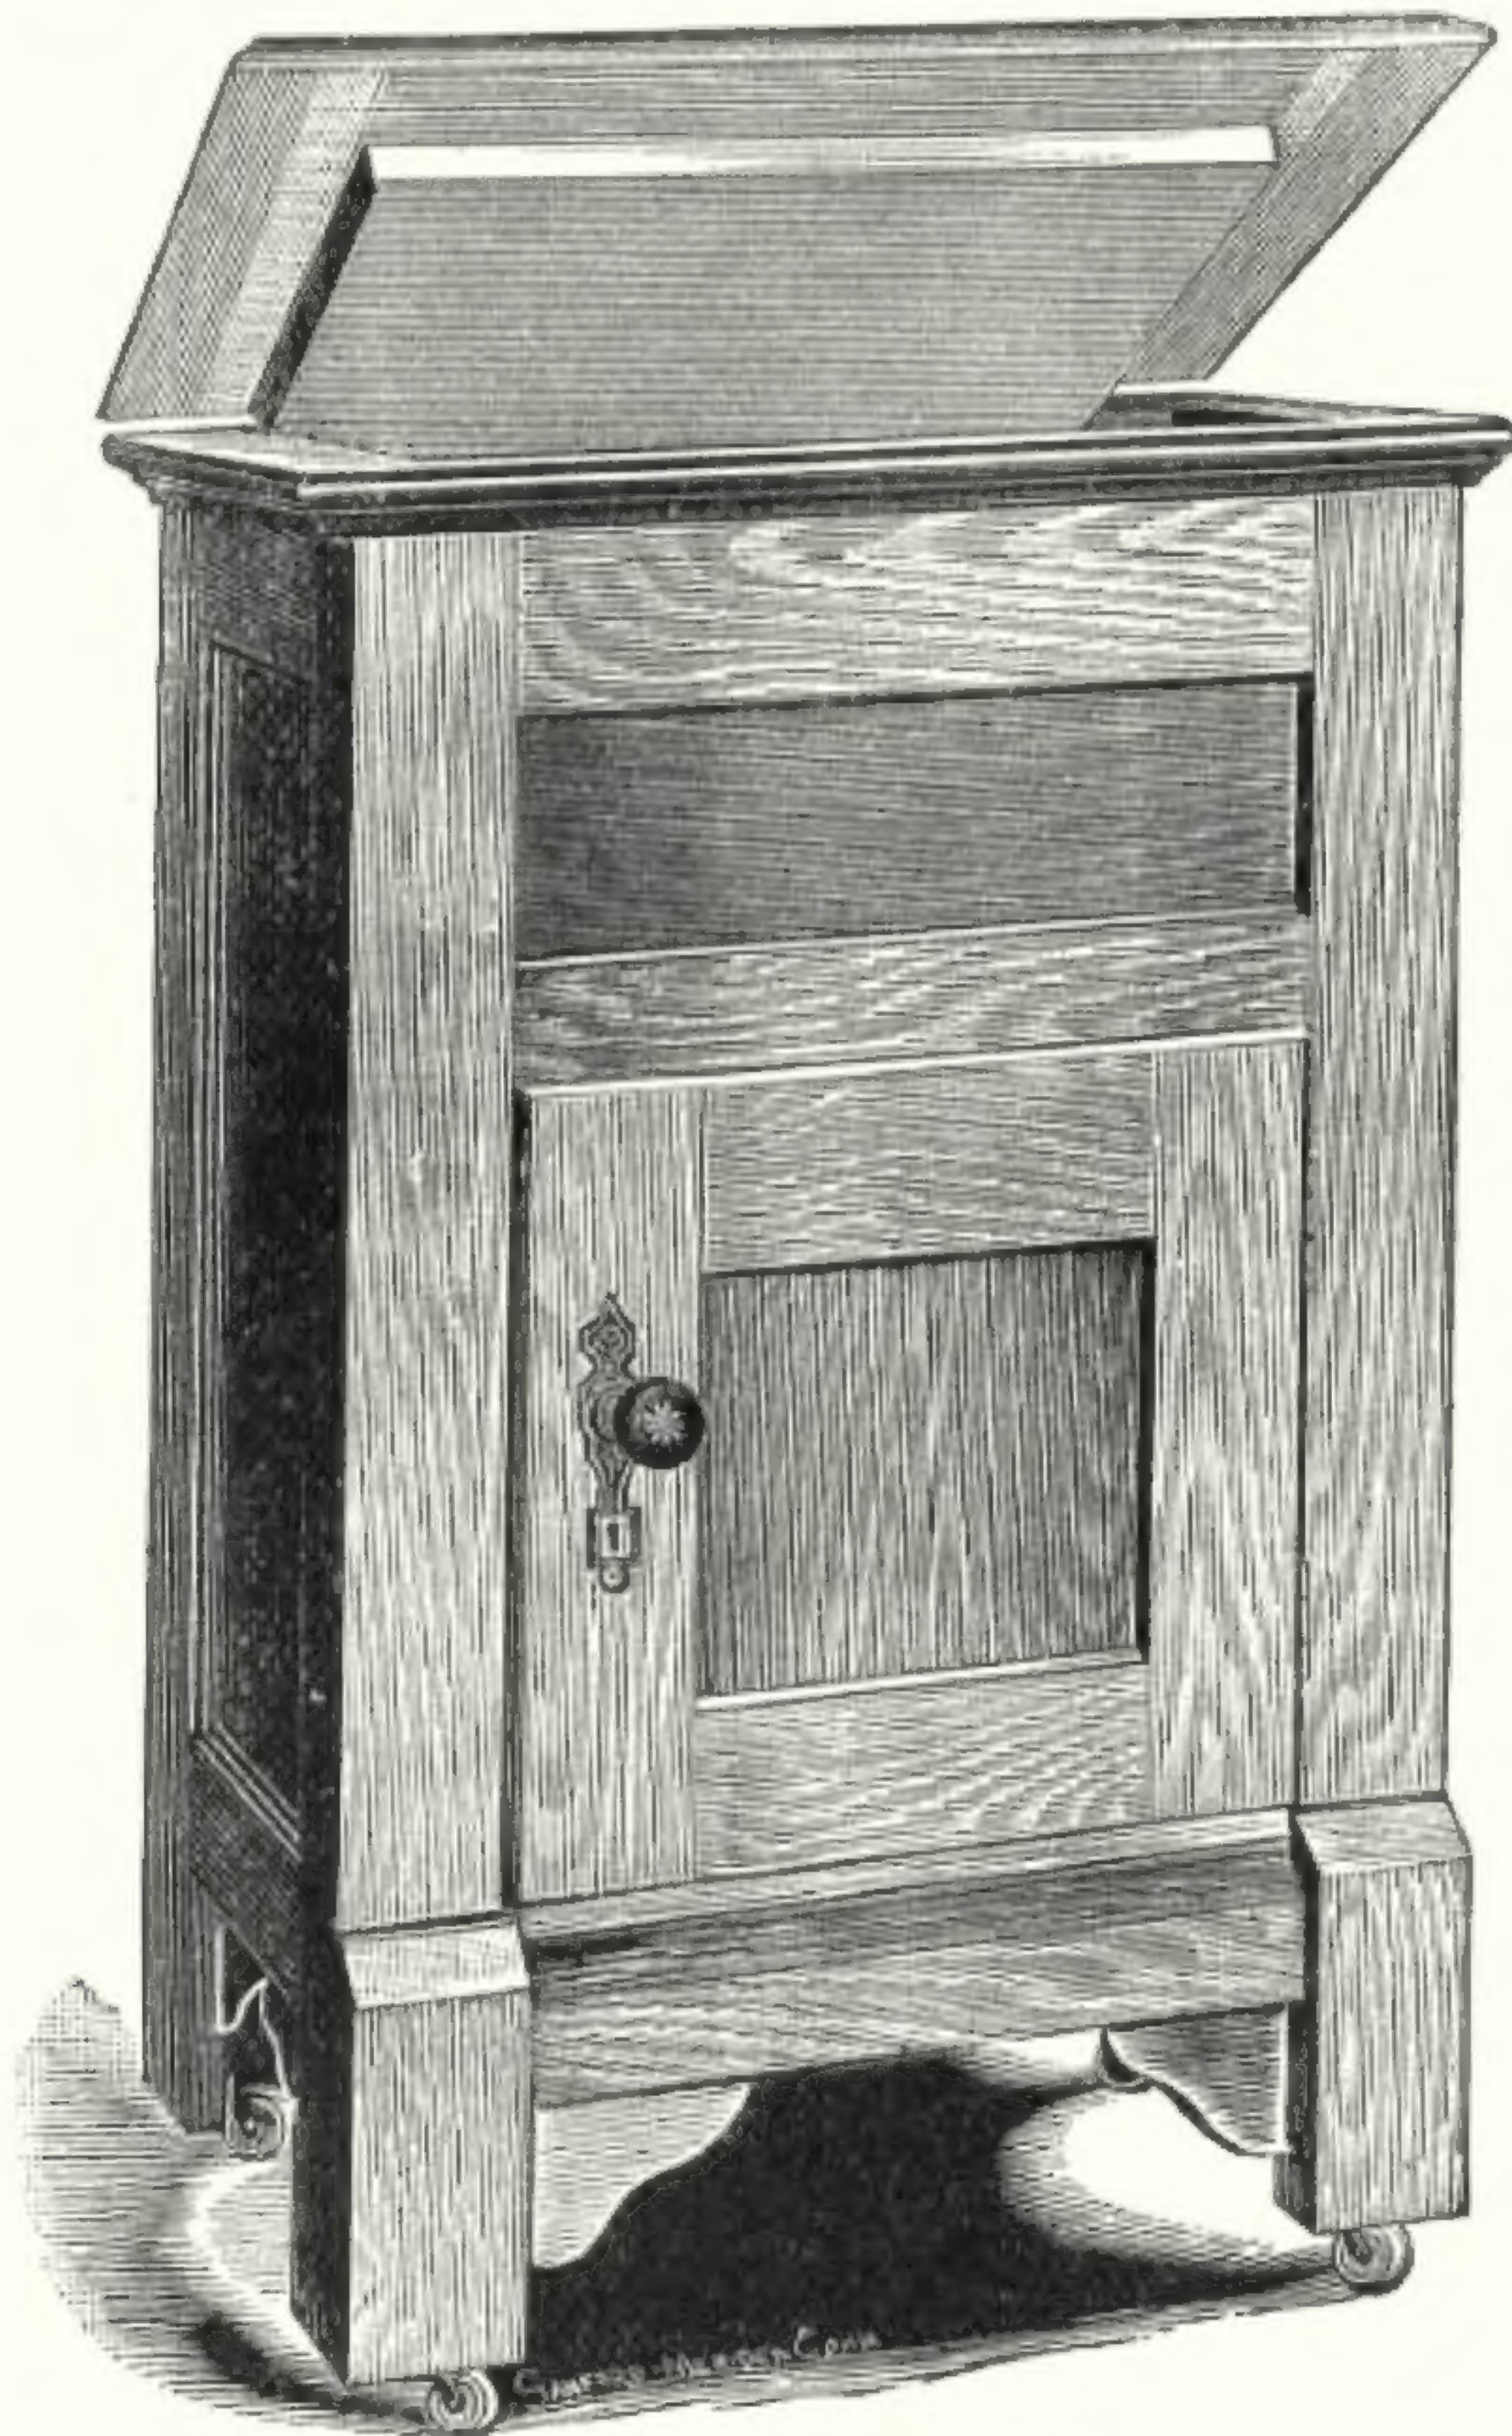

Respectfully yours, etc ,

GEO. N. PIERCE & CO.

Dry Air "Polar" Refrigerator.

HARDWOOD.

We offer to our customers this year our New Hardwood Refrigerator, the demands of the trade for a cheap Hardwood Refrigerator being so great that we have made these goods. They are first-class in every respect, finished in the best style, elegantly trimmed, "DRY AIR," and perfect goods, and charcoal filled, as ALL our Refrigerators are.

GEO. N. PIERCE & CO.'S

Special Notice to the Trade.

FOR THE SEASON OF 1893.

We have never presented to the trade as complete a line of Refrigerators, made in both **HARDWOOD**, finished in "**ANTIQUE**;" and Pine, grained in **OAK** and **WALNUT** colors, as we offer you for this season's trade. Our line of **Sideboard Refrigerators** has been largely increased, so that now we have one of the finest lines of this most desirable and economical article of furniture. They are all made in the most thorough manner, constructed so that they are

Self-Ventilating, DRY AIR,

Free from any Taint or Odor.

Having the most perfect Galvanized Iron Ice Chamber, thoroughly fastened and secured on both sides, ends, and the bottom. Our **SHELVES** are the strongest and most perfectly made of any in the market. We have **Elegant New Styles of**

Bronze Surface Locks and Hinges

AND

Porcelain Casters.

We use No. 1 Coach Varnish for the last coat on all our Refrigerators, and after papering them, frame them securely with **3** in. strips, and deliver them F. O. B. cars Buffalo.
